

WRO 2022 FRIENDSHIP INVITATIONAL

JUNIOR AGE GROUP

SURPRISE RULE

A brave firefighter got stuck in the burning factory. There is no time to wait for any other help, the robot has to get him out of there. The firefighter is placed in the same room where the first fire was placed during randomization and will occupy the object position that is free. The robot has to take the firefighter to one of the firefighter trucks. Points will be awarded if the base of the firefighter touches the firefighter truck (does not have to be completely on the truck). It does not matter if he is standing or lying. Remember, that the surprise rule is considered a bonus point, therefore you can only get points for it if you achieve any other base challenge points.

Surprise rule points awarded: 25 points
